

AMNA SAKHI

[amnaa26](#) / [Amna](#) / amna.sakhi26@gmail.com / [+92 3303788088](tel:+923303788088)

OBJECTIVE

Passionate BS Artificial Intelligence student seeking roles in machine learning, research and full stack AI development.

EDUCATION

Bachelor in Artificial Intelligence at FAST-NUCES Khi Campus	(CGPA: 3.47/4.0)	2023 –Present
Intermediate in Pre-Engineering at DHACSS-College for Women	(Grade: A+)	2021 – 2023
Matriculation in Bio-Science at DHACSS-Phase IV Campus	(Grade: A+)	2019 – 2021

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Prolog, Assembly, SQL, ReactJS

Frameworks & Libraries: FastAPI, Pydantic, SFML, Pygame, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, SQLAlchemy

Databases & Tools: MongoDB, Git, Github, RESTful APIs

Technologies: System Design, Machine Learning, Artificial Intelligence, Backend-Development, Data Analysis, OOP

EXPERIENCE

FAST- NUCES

Teaching Assistant - Data Structures

Karachi, Pakistan

September 2025 - Present

- **Assisted** students in understanding critical concepts, including linked lists, trees, and graphs, using C++.
- **Designed** and graded quizzes and projects, ensuring fairness and conceptual depth.

Aviro Systems

Intern

Karachi, Pakistan

June 2025 – August 2025

- **Built** an AI-driven tutoring platform using LLM APIs(ChatGPT, Claude), generating personalized quizzes and explanations.
- **Integrated** FastAPI + MongoDB backend and ReactJS frontend for adaptive learning and data tracking

PROJECTS

AI-Powered Pac-Man Game AI Course Project

2025

- **Built** a 2-player Pac-Man game with AI-driven ghosts and a procedurally generated maze using Pygame.
- **Implemented** BFS, A*, Minimax, and Genetic Algorithms for intelligent ghost pathfinding and pursuit.

E-Learning Management System (LMS) Full-Stack Web Project

2025

- **Developed** a secure backend using FastAPI and MongoDB, featuring authentication, authorization, and email-based OTP verification.
- **Implemented** role-based access control for Admin, Teacher, and Student modules with course, lecture, and enrollment management.

Multi-Threaded File Downloader with Verification Operating Systems Course Project

2025

- **Built** a multi-threaded file downloader in C using pthread synchronization and libcurl for parallel downloads.
- **Implemented** Adler-32 checksum verification for data integrity.
- **Developed** a real-time GTK UI displaying download progress, verification status, and system errors.
